

AUTODESK AUTOCAD FUNDAMENTALS

Course Length: 8 Hrs

Schedule: 8:30am - 5:30pm

Designed For:

The Autodesk AutoCAD Training Course is designed for the new software users who requires comprehensive training. The course is also designed for Engineers, Architects and other industry-related professionals who requires additional training in AutoCAD.

Learning Objectives:

After completing this session you will be able to:

- ✚ Understand the AutoCAD workspace and user interface.
- ✚ Organize drawing objects on layers.
- ✚ Insert reusable contents such as blocks to the drawing.
- ✚ Works with layouts and plotting.
- ✚ Annotate and add dimensions to the drawing.

Prerequisites:

No prerequisites required other than a working knowledge of Microsoft® Windows® 7 or 8.

What you get:

Students will get Training Module and an industry-recognized Certificate of Completion.

Notes:

The course length is a guideline. Course topics and duration may be modified by the instructor based upon the knowledge and skill level of the students.

All courses will be taught on the products included in the current Autodesk® 2017 release.

Course Description:

The course covers basic topics for AutoCAD software by starting with the basic tools that will enable the students to create, edit and manipulate 2D drawings and then to continue to develop these tools. The course also incorporates the features, commands and techniques for becoming more productive when creating, annotating, dimensioning and plotting drawings.
